Your Resource Driving Manufacturing Innovation

LEAN Assessment

What is involved?

1. A brief question and answer session to gather information about your business.
2. A guided tour of the facility as we follow the flow of orders through the office and the shop, identify the 8 wastes, and look for evidence of the use of LEAN tools.
3. A review of the information gathered and a summary of opportunities and priorities based on our expertise.
4. A report of our analysis.

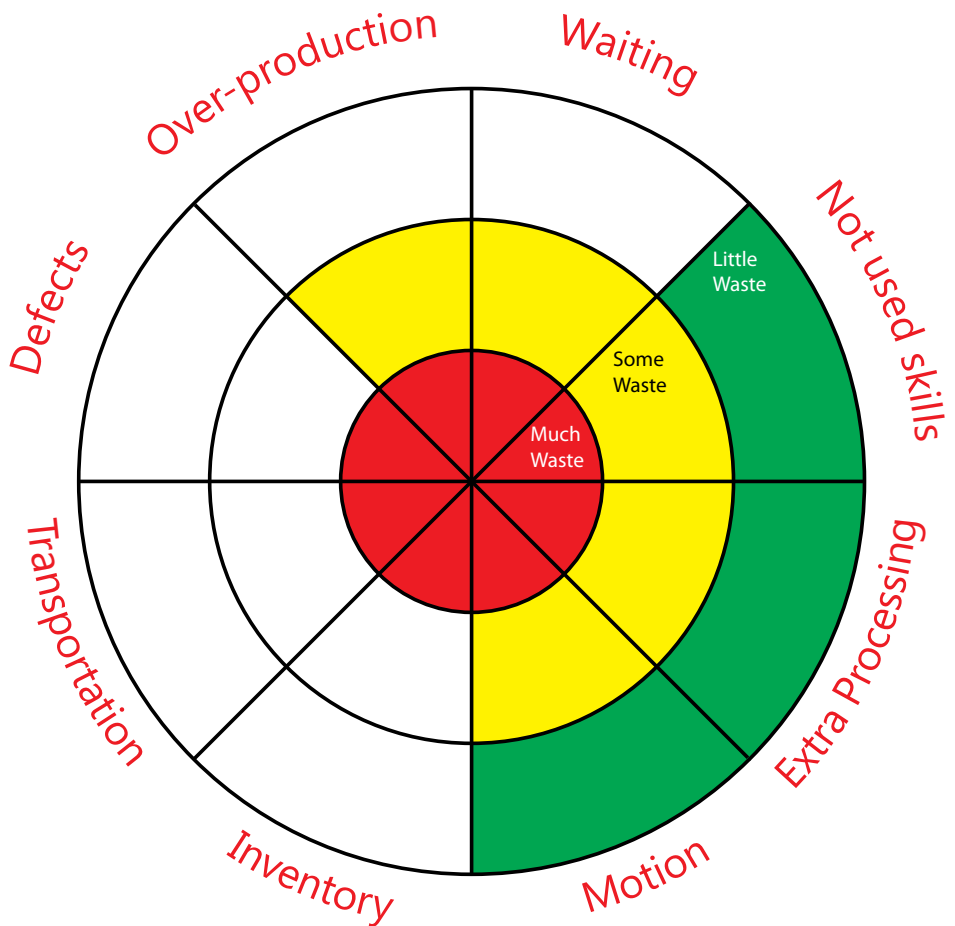

Where are your wastes?

During the assessment 8 categories of waste are evaluated and rated much, some or little waste.

These activities do not add value to the product and cut into the profit of your organization.

After the wastes are identified recommendations are made in how to improve your process.

MANTEC will continue on the LEAN journey with you and use our knowledge of the Tools of LEAN to reduce your wastes.

To set up your assessment contact your District Manager directly or MANTEC at 717-843-5054.
