

Process Improvement/LEAN

LEAN Executive Overview

MANTEC's LEAN Executive Overview is designed to highlight the aspects of the non-valued activities in an organization and how they can impact value to their customers. This is geared specifically to the organization's management team. During the overview the discussion will focus on the eight non-value added wastes, known as DOWNTIME.

Defects
Overproduction
Waiting
Non utilized employee skills
Transportation
Inventory
Motion
Extra processing

The discussion includes the tools to eliminate the wastes, case studies and bottom line results. During the overview organizations typically share their own internal struggles with the eight wastes and the cultural changes required to sustain the path forward.

Outcomes

The goal is to establish a roadmap to get the organization started on the LEAN journey. For some this means a LEAN Assessment, LEAN Principles training or a 5S & Value Stream Mapping project.

The management team is left with a handout of the overview PowerPoint presentation.

Requirements

45 minutes to 1 1/2 hours, depending on number of questions and discussions

A comfortable room at your facility with a screen or light colored wall for presentation projection.
